EXPERIENCE

IBM — Senior Developer

JANUARY 2020 - NOVEMBER 2020

Technical Lead in the back-end development team of an Accounts Payable platform.

Tech: JavaScript, Node.JS, npm, git, Express, nodemailer, passport, OAuth, OpenID Connect, SAML, Azure OIDC, dotenv, cookie-parser, winston, axios, ibm_db, jsonwebtoken, JWT, moment, body-parser, microservice architecture, TDD, Mocha, Chai, Java, React, Docker, Kubernetes, JIRA, IBM Cloud.

Buenos Aires City Government — Senior Developer

SEPTEMBER 2018 - JANUARY 2020

Maintenance and development of apps in the official Google Play and App Store accounts.

Milestone: Refactoring of the *Denuncia Vial* app, both Android (Java) and iOS (Swift 3) versions, to be compatible with a new RESTful API that replaced the old SOAP API in which the applications relied upon, achieving a 20% reduction of communication errors.

Tech: Java, Swift, CocoaPods, maven, git, ReactiveX, RxSwift, RxJava, Trello.

Technical Lead of the development and maintenance team of the official site for the city of Buenos Aires and its related microsities.

Milestone: Redesign of the structure of our code repositories and submodules that, when partnered with the establishment of new standards, helped to greatly reduce lead time. This meant transitioning from occasional deploys, often months apart, to scheduled, biweekly deployments after ending each sprint.

Tech: Node.JS, Vue, Angular, OpenShift, docker, PHP, Drupal, composer, docker, CentOS, RHEL, git, github, SOAP API, REST API, HTML, CSS, SASS.

BROOTAL — Full-stack Developer
